SUMMARY

I'm a passionate software developer, software engineer and full-stack developer focused on creating elegant and efficient solutions for web and mobile applications. With a strong foundation in computer engineering. I love bringing ideas to life through code. Currently exploring the intersection of web development, mobile apps, system design, or related jobs to build scalable solutions.

EDUCATION

Bachelor's Degree in Faculty of Computer Engineering and Informatics Jun 2022 - Mar 2026
Kasetsart University Sriracha Campus
GPA : 2.98

High School Diploma (Science, Mathematics, Technology and Environment) Nov 2019 - Mar 2022
Saparachinee Trang School
GPA : 3.65

HARD SKILL

- **Programming Language:** Python, C, C++, JavaScript, Java
- **Web&Tool:** React , MySQL, Mongo DB, Neon Database, Supabase, HTML/CSS, Docker, Figma, Node.JS, Git
- **AI Agent:** Claude Code, Gemini, Codex
- **Languages:** Thai, English (B1)

EXPERIENCE

Siam Michelin LMC Site Internship (Quality Obtention) Dec 2025 - Mar 2026

- Implemented Dataiku to manage the data pipeline, integrating data from multiple systems. This reduced redundant steps in data analysis across the production process and enabled the Quality Obtention (QO) team to identify the root causes of substandard rubber more quickly and accurately.
- Managed data and developed systems to improve cross-departmental efficiency between the FIS (Final Inspect Shop), QO (Quality Obtention), and DMTC departments, by building applications on Power Apps to convert paper-based document processes into a digital platform with clear, overview-level data visualization.

Beplan application (Software Engineering Project) Feb 2025 - Mar 2025

- Developed Beplan application a smart scheduling application integrated with AI
- Designed an intuitive user interface that seamlessly bridges user inputs with AI-generated suggestions to enhance personal productivity.
- Managed database using Neon (Postgres) to handle data efficiently
- Conducted API testing using Postman to verify the accuracy of the data received.

CREMA — Coffee Machine Kiosk (Application Development Project) Apr 2024 - Mar 2024

- Developed a self-service coffee ordering system using React Native (Expo) and TypeScript, supporting touchscreen kiosk, mobile app, and web admin interfaces from a shared codebase.
- Implemented PromptPay/EMVCo QR payment generation from scratch, including TLV encoding and CRC-16/CCITT-FALSE checksum validation, with Jest test coverage.
- Built a Flask REST API with MongoDB Atlas for product management, order processing, and CSV data export.
- Applied TypeScript, ESLint, Prettier, Jest, and pytest to maintain code quality and reliability.
